Prepared by Peter Schlyter	Approved by Management Board		Doc. Nr. 43443 (3LED)	

Quality Policy

By working proactively, CG Drives and Automation should meet our customers' requirements and expectations with high quality products and services.

Process Approach and Continuous Improvement

Our success will be achieved by identifying, communicating, visualizing and continuously improving our processes.

Our customer's requirements and expectations of our products shall be converted into relevant and individual action items and the results should be monitored against measurable and visible **quality objectives**.

By doing this, every team member can understand what he/she can contribute with to increase customer satisfaction and quality improvement in general.

Future suitability

The processes, quality objectives and this policy will continuously be reviewed and improved in order to make sure that the QMS (Quality Management System) is efficient and suitable for the present and future need of CG Drives & Automation and our customers.

A preventive and proactive approach will always be applied.
