Information about this program package

Anybus IPconfig ver. 1.8.1.2- Utility for Anybus Ethernet products

Compatibility: Windows 2000/XP/Vista/7 (Win 7 32 and 64 bit)

Installation and start instructions:

1. Run the setup file "Anybus IPconfig Setup 1.8.1.2.exe"
2. Start the program by going "Start->Programs->HMS->Anybus IPconfig->Anybus IPconfig"
3. The program will automatically scan the connected Ethernet network for Anybus devices, a manual refresh can be made by pressing the "Scan" button.
4. Open the web interface of the discovered module by right clicking on the line of the module.
Note: This requires the TCP/IP settings to be correct, correct sub-net etc.
