

## ENGLISH

### Addendum valid for Emotron VFX/FDU 2.0-2Y AC drives

Addendum to the following instruction manuals with document number:

01-5665-01r1 for Emotron FDU 2.0-2Y valid from software version 4.39 and

01-5666-01r1 for Emotron VFX 2.0-2Y valid from software version 4.39

## 1. Added functionality

### 1.1 Two standard softwares

To meet the demand of having more available languages we have divided the languages into two Language sets. Explained in chapter “1.4 Type code number” in the table at position 16 - Software, see also below.

| Position | Configuration |   |
|----------|---------------|---|
| 16       | Software type | A= Standard software (Language set 1)<br>U= Std sw Language set 2<br>See menu “Language [211]” below. |

### Language [211]

Select the language used on the LC Display. Once the language is set, this selection will not be affected by the Load Default command.

There are two software sets with different languages available for delivery. “Standard software with Language set 1” and the optional “Standard software with Language set 2”, see table below.

| 211        |   | Language         | Language set |       |
|------------|---|------------------|--------------|-------|
| Default:   |   | English          | Set 1        | Set 2 |
| English    | 0 | English selected | X            | X     |
| Svenska    | 1 | Swedish selected | X            | -     |
| Nederlands | 2 | Dutch selected   | X            | -     |
| Deutsch    | 3 | German selected  | X            | X     |
| Français   | 4 | French selected  | X            | -     |
| Español    | 5 | Spanish selected | X            | -     |
| Русский    | 6 | Russian selected | X            | -     |
| Italiano   | 7 | Italian selected | X            | -     |
| Cesky      | 8 | Czech selected   | -            | X     |
| Turkish    | 9 | Turkish selected | -            | X     |

### Communication information

|                                  |         |
|----------------------------------|---------|
| Modbus Instance no/DeviceNet no: | 43011   |
| Profibus slot/index              | 168/170 |
| EtherCAT index (hex)             | 4bc3    |
| Profinet IO index                | 19395   |
| Fieldbus format                  | UInt    |
| Modbus format                    | UInt    |

## 1.2 Additional motor parameters for PMSM motors

### PMSM data [22J]

Additional motor parameters for Permanent Magnet Synchronous Motors (PMSM).

This menu is only available if PMSM is selected in menu [22I].

### Motor BEMF [22J1]

Set the back EMF of the motor at the nominal operating point. This parameter may not be explicitly available from the manufacturer, but can then be computed from the electrical constant  $K_e$  and the nominal speed.

| 22J1 BEMF  |                 |
|------------|-----------------|
| Default:   | Motor dependent |
| Range:     | 100-700 V       |
| Resolution | 1 V             |

#### Communication information

|                                  |             |
|----------------------------------|-------------|
| Modbus Instance no/DeviceNet no: | 43391       |
| Profibus slot/index              | 170/40      |
| EtherCAT index (hex)             | 4d3f        |
| Profinet IO index                | 19775       |
| Fieldbus format                  | Long, 1=0.1 |
| Modbus format                    | Elnt        |

### Rs ( $\Omega$ /ph) [22J2]

Set the per phase stator resistance..

| 22J2 Rs ( $\Omega$ /ph) |                        |
|-------------------------|------------------------|
| Default:                | Undef                  |
| Undef                   | Undefined              |
| Range:                  | 0.000001-40.000000 ohm |

#### Communication information

|                                  |                 |
|----------------------------------|-----------------|
| Modbus Instance no/DeviceNet no: | 43392           |
| Profibus slot/index              | 170/41          |
| EtherCAT index (hex)             | 4d40            |
| Profinet IO index                | 19776           |
| Fieldbus format                  | Long, 1=0.00001 |
| Modbus format                    | Elnt            |

### Lsd (mH/ph) [22J3]

Set the per phase d-axis stator inductance.

| 22J3 Lsd (mH/ph) |                    |
|------------------|--------------------|
| Default:         | Undef              |
| Undef            | Undefined          |
| Range:           | 0.001-10000.000 mH |

#### Communication information

|                                  |               |
|----------------------------------|---------------|
| Modbus Instance no/DeviceNet no: | 43393         |
| Profibus slot/index              | 170/42        |
| EtherCAT index (hex)             | 4d41          |
| Profinet IO index                | 19777         |
| Fieldbus format                  | Long, 1=0.001 |
| Modbus format                    | Elnt          |

### Lsq (mH/ph) [22J4]

Set the per phase q-axis stator inductance.

| 22J4 Lsq (mH/ph) |                    |
|------------------|--------------------|
| Default:         | Undef              |
| Undef            | Undefined          |
| Range:           | 0.001-10000.000 mH |

#### Communication information

|                                  |               |
|----------------------------------|---------------|
| Modbus Instance no/DeviceNet no: | 43394         |
| Profibus slot/index              | 170/43        |
| EtherCAT index (hex)             | 4d42          |
| Profinet IO index                | 19778         |
| Fieldbus format                  | Long, 1=0.001 |
| Modbus format                    | Elnt          |

### 1.3 Added brake functionality on Emotron VFX

#### DC Hold [33J]

This function makes it possible to apply a DC-voltage to the motor at zero speed. This provides a (low) holding torque. This function is only available in speed mode in Emotron VFX.

#### DC Hold [33J1]

Enabling of DC hold functionality.

| 33J1 DC Hold |     |
|--------------|-----|
| Default:     | Off |
| Off          | 0   |
| On           | 1   |

#### Communication information

|                                  |        |
|----------------------------------|--------|
| Modbus Instance no/DeviceNet no: | 43148  |
| Profibus slot/index              | 169/52 |
| EtherCAT index (hex)             | 4c4c   |
| Profinet IO index                | 19532  |
| Fieldbus format                  | UInt   |
| Modbus format                    | UInt   |

#### DC Holding Speed [33J2]

Select the speed at which DC hold is released / enabled. DC hold is activated if both the speed and the speed reference is below this value.

| 33J2 DC Hold Spd |             |
|------------------|-------------|
| Default:         | 10 U/rpm    |
| Range:           | 0 - 250 rpm |

#### Communication information

|                                  |           |
|----------------------------------|-----------|
| Modbus Instance no/DeviceNet no: | 43149     |
| Profibus slot/index              | 169/53    |
| EtherCAT index (hex)             | 4c4d      |
| Profinet IO index                | 19533     |
| Fieldbus format                  | UInt, 1=1 |
| Modbus format                    | UInt      |

#### DC Holding Current [33J3]

Select the applied DC hold current in percent of nominal motor current.

| 33J3 DC Hold Cur |           |
|------------------|-----------|
| Default:         | 30 %      |
| Range:           | 0 - 100 % |

#### Communication information

|                                  |           |
|----------------------------------|-----------|
| Modbus Instance no/DeviceNet no: | 43150     |
| Profibus slot/index              | 169/54    |
| EtherCAT index (hex)             | 4c4e      |
| Profinet IO index                | 19534     |
| Fieldbus format                  | UInt, 1=1 |
| Modbus format                    | UInt      |
